Aerospace Engineering

FH Wiener Neustadt

Fraunhofer UMSICHT, Sulzbach-Rosenberg Germany

Master thesis

MOTIVATION

I wanted to do a master thesis related to CFD, and I found a great opportunity in a research centre in the heart of Bavaria.

INSIDER TIP

Take it easy and stay open minded. That'll help to make friends and blend in with the locals. Don't forget to travel around the areas you have close.

BIGGEST DIFFERENCE

In my case no big difference. South Germany and Austria have same language, same food and very similar culture.

CHALLENGES & HURDLES

It was very challenging to find accommodation. However, a stroke of luck allowed me to spend the Erasmus in one of the nicest areas of Amberg, right next to the river shown above.

FUN FACT

We went to Annabergfest, the highlight of the year in Sulzbach –Rosenberg. It is a great opportunity to enjoy the local beer and get tipsy with your boss.
