FH Wiener Neustadt

University of Seoul, Seoul, Korea

semester abroad

MOTIVATION

Studying at the University of Seoul immersed me in South Korea's great culture and traditions. From exploring historical landmarks, trying delicious Korean cuisine and to attending university every moment was new cultural experience. Being able to study abroad and experiencing campus life while also getting to know Korea was truly amazing.

INSIDER TIP

Take advantage of all the historical landmarks Korea has to offer. There are so many activities which are free and really fun to do like: hike up to Seoul tower, rent a Hanbok and go to Gyeongbokgung Palace, go to free museums and many more.

BIGGEST DIFFERENCE

The culture difference is not that extreme, but you may need to be aware that the language barrier is bigger than expected. Try to learn a few Korean phrases before you go.

CHALLENGES & HURDLES

The first few days it was hard to figure out the subway system but after taking it a few times it´s really easy and straightforward.
It is a bit hard to make Korean friends because they are quite shy about their English. That´s why you should participate in the Seoul Mate programme to meet some Korean friends.

FUN FACT

Don´t bring too many clothes or skin care products. You will buy them all there. And bring an extra suitcase for all the souvenirs
